I am a **Front-End Software Developer/ Web Developer located** in Toronto, Canada with a year of experience. I have worked with popular client sided Frameworks such as React.JS, JavaScript (ES6), HTML, CSS, JS, and Responsive Design alongside with WordPress and created over 10 projects with them. As a recent graduate, I am now currently learning back-end frameworks such as Node.js MongoDB Express and SQL to expand into **full stack development**. I am a team player, problem solver and presenter with excellent communication skills. I also have experience in working with an agile environment with a desire to learn paired with strong communication skills.

SKILLS
